## FULLY ELECTRONIC MOBILE WEIGHBRIDGE

If you opt for our mobile weigh bridge with inbuilt steel foundation plates you don't require any civil foundation work. For the erection of the weighbridge only a well leveled hard surface is required.

One of the premium benefits of mobile weighbridge is that it can be installed within 2 hours and can be easily taken to the other place without any hassle.

We understand the importance of the products and the value of long-term relations with our customers. Hence, our mobile weighbridge is the true example of excellence, quality, and durability.

Every mobile weighbridge is quality tested and comes with 100% quality assurance before it goes for the sale. A part of the unique design, the product is clothed with unique features and is built with state-of-the-art technology to produce satisfied and accurate results when a truck passes over it for the weight.

Mobile weighbridge has become the first choice for various industries: transport, waste, forestry, agriculture, mining, construction and so on. Our features' enriched product has been the main reason why so many industries prefer to buy from us and why even small businesses consider us for their weighing needs of their cargo loaded trucks.

Model No.	Capacity	Accuracy	Platform size (mtr)
